

TECHNICAL SPECIFICATION OF FINISHED PRODUCT

NAME OF THE PRODUCT

Sal Bruta Premium

DESCRIPTION

SAL BRUTA PREMIUM is a Raw Salt for industrial use that is defined as a crystalline solid obtained through solar evaporation of water from the Los Olivitos swamp under strict physical-chemical controls. The salt is harvested and washed with fresh brines that remove the largest possible amount of insoluble matter inherent to the production process, thus achieving high quality standards for our customers.

ADDITIVES

No Additives added.

PACKAGE / STORAGE

Presentation:

Packaged:

Polietilene bags 20 kg.
Up to 75 bags per pallet, 7 lines/pallet, the first 2 of 10 bags and the next 5 of 11 bags

Bulk:

Transport trucks with canvas covers under conditions that do not affect the integrity of the product, free of foreign materials or substances, strong odors and free of animals or any plagues..

Big bags:

Preferably provided by the client. It is recommended to use Big Bags of maximum 1500kg. Restrictions apply.

Storage:

Hygroscopic Product.
To improve the resistance to agglomeration of salt particles, the product should be stored in a dry and covered area, with relative humidity below 75%.

RECOMMENDED USES:

Recommended for the petrochemical, chemical, water treatment and general industry sectors, as well as raw material for processing salt for human and animal consumption.

Requires processing for uses other than industrial application.

TRANSPORT

Distribution is carried out through direct shipments to customers at our plant for collection and transportation according to the international trade term EXW.

PHYSICAL CHEMICAL REQUIREMENTS

Parámetro	Rango	Método	Normativa	Frecuencia	CoA
Sodium Chloride (Dry basis) % p/p	99,3 mín	Method ASTM E534-98	N/A	Per lot	Yes
Sulfates (as SO4) % p/p	0,2 máx			Per lot	Yes
Insoluble in water % p/p	0,08 máx			Per lot	Yes
Superficial Moisture % p/p	3,5 máx			Per lot	Yes
Magnesium (as Mg++) %p/p	0,03 máx			Per lot	Yes
Calcium (Ca++) % p/p	0,06 máx			Per lot	Yes
Density g/L	1120-1130			Internal	No

SHELF LIFE

NON-PERISHABLE PRODUCT

Salt is a non-perishable product, it does not deteriorate and does not generate pathogen growth. It is recommended to follow the storage instructions to avoid the agglomeration effect of salt particles.

CPE (Regulatory net weight content number)

Bags 20 kg: CPE0317416481

PARTICLE SIZE

U.S.S Mesh	Wide (mm)	Retention (%)
US 1/2	12,50	1 - 8
US 3/8	9,50	4 - 11
US 1/4	6,30	16 - 27
US 5	4,00	22 - 30
US 6	3,35	6 - 11
US 8	2,36	8 - 19
US 10	2,00	2 - 8
US 12	1,70	1 - 4
US 16	1,18	3 - 9
US 20	0,85	1 - 4
Plato	<0,85	1 - 4

The particle size reflected in this specification are the typical values obtained in the analyses, however they are for informational and/or referential purposes.

GENERAL CONSIDERATIONS

All statements, recommendations, suggestions and data presented are based on our laboratory results. However, this information is for informational and/or reference purposes only.
