

TECHNICAL SPECIFICATION OF FINISHED PRODUCT

NAME OF THE PRODUCT

Sal Bruta Tipo A

DESCRIPTION

Type A Salt is a product for industrial use that is defined as a crystalline solid obtained through the recovery of brines from the Premium Salt production process. This salt is harvested and washed with fresh brines that remove the greatest possible amount of insoluble matter inherent to the production process, thus achieving high quality standards for our customers.

ADDITIVES

Do not content additives

RECOMMENDED USES

Recommended as a raw material for processing salt for human or animal consumption, as well as for industry in general.

Requires processing for uses other than industrial application.

PRESENTATION / STORAGE

Presentation

Packaging:

20 kg polyethylene bags.
Up to 75 bags per pallet, 7 lines/pallet, 2 first upper layers of 10 bags and the next 5 lower layers of 11 bags.

Bulk:

The product must be collected in transport trucks with canvas under conditions that do not affect the integrity of the product, free of foreign materials or substances, strong odors and free of animals.

Big bags:

Customer preference. It is recommended to use Big Bags of maximum 1500kg. Restrictions apply.

Storage:

Hygroscopic Product.
To improve the resistance to the agglomeration of salt particles, the product must be stored in a dry and covered area, with a relative humidity below 75%.

TRANSPORT

Distribution is carried out through direct shipments to customers at our plant for collection and transportation according to the international trade term EXW.

PHYSICAL & CHEMICAL REQUIREMENTS

Parámetro	Rango	Método	Normativa	Frecuencia	CoA
Sodium Chloride (Dry basis) % p/p	98,5 mín	ASTM E534-98	N/A	Per lot	Yes
Sulfates (SO ₄) % p/p	0,6 máx			Per lot	Yes
Insoluble in water % p/p	0,1 máx			Per lot	Yes
Superficial Moisture % p/p	3,5 máx			Per lot	Yes
Magnesium (Mg++) %p/p	0,18 máx			Per lot	Yes
Calcium (Ca++) % p/p	0,2 máx			Per lot	Yes
Density g/L	1110-1120			Internal	No

SHELF LIFE

NON-PERISHABLE PRODUCT

Salt is a non-perishable product, it does not deteriorate and does not generate pathogen growth. It is recommended to follow the storage instructions to avoid the agglomeration effect of salt particles.

CPE (Regulatory net weight content number)

Bags 20 kg: CPE0317416482

PARTICLE SIZE

U.S.S Mesh	Wide (mm)	Retention (%)
US 1/2	12,50	1 - 8
US 3/8	9,50	4 - 11
US 1/4	6,30	16 - 27
US 5	4,00	22 - 30
US 6	3,35	6 - 11
US 8	2,36	8 - 19
US 10	2,00	2 - 8
US 12	1,70	1 - 4
US 16	1,18	3 - 9
US 20	0,85	1 - 4
Plato	<0,85	1 - 4

The particle size reflected in this specification are the typical values obtained in the analyses, however they are for informational and/or referential purposes.

GENERAL CONSIDERATIONS

All statements, recommendations, suggestions and data presented are based on our laboratory results. However, this information is for informational and/or reference purposes only.
